Professional Summary

Detail-oriented Computer Science graduate with a strong foundation in Data Engineering, Artificial Intelligence, Machine Learning, and NLP. Skilled in Python, SQL, PySpark, and data processing workflows, with hands-on experience in building scalable projects and AI-driven applications. Passionate about solving real-world problems through data-driven solutions and continuously learning modern technologies. Possesses strong analytical, problem-solving, and collaborative skills with a results-oriented mindset and the ability to adapt quickly in professional environments.

Experience

Internship at Pragyashal 3 months

- Completed a 3-month internship focused on Machine Learning with hands-on exposure to real-world problem-solving approaches.
- Worked on data preprocessing, basic model development, and machine learning workflows to strengthen practical understanding of AI concepts.

Cognizant Technology Solutions Hyderabad, India
Programmer Analyst Trainee July 2025 – Present

- Undergoing training in **Data Engineering** and **SQL** workflows.
- Learning **Machine Learning** and **Generative AI** applications through professional modules.
- Working on data transformation tasks and basic pipeline structures using **Python** and **PySpark**.

Technical Skills

Core Programming: Python, Java, SQL, PySpark
Data Engineering: Azure Data Factory (ADF), ETL/ELT Pipelines, Data Modeling, DBMS
AI & Analytics: Machine Learning, NLP, Generative AI
Tools & Visualization: Power BI, Git, Linux, Docker, Jupyter Notebook

Projects

Text Summarization Platform Python, NLP, TF-IDF, SpaCy, NLTK, streamlit

- Developed an NLP-based summarization system for handling large unstructured text datasets from multiple sources.
- Capable of generating concise summaries from PDFs, articles, and live Wikipedia pages.
- Built preprocessing pipelines using tokenization, stemming, stop-word removal, and TF-IDF vectorization for semantic ranking.
- Optimized document processing workflows for efficient handling of large unstructured text datasets.
- Designed modular architecture for scalable text analysis and future LLM integration.
- **GitHub:** github.com/naganihita/text-summariser

Gender Prediction System Python, Deep Learning

- Developed a deep learning model to classify gender from Indian names using character-level feature extraction techniques.
- Applied preprocessing, feature engineering, and synthetic data augmentation to improve model generalization.
- Built optimized training pipelines and real-time prediction workflows for scalable inference.
- Improved classification performance through neural network tuning and data optimization techniques.
- **GitHub:** github.com/naganihita/Genderprediction

Education

Rajiv Gandhi University of Knowledge Technologies, RK Valley B.Tech in Computer Science and Engineering Idupulapaya,Kadapa,Andhrapradesh	2021 – 2025 CGPA: 9.46/10
Rajiv Gandhi University of Knowledge Technologies, RK Valley Pre University Course Idupulapaya,Kadapa,Andhrapradesh	2019 – 2021 CGPA: 10/10
ZPHS Komannuthala, Andhra pradesh,SSC	2018 – 2019 CGPA: 10/10

Certifications

- **Cloud Computing** (Elite + Top 2%) – NPTEL | IIT Kharagpur
- Databricks Certified Generative AI Engineer Associate
- Solved 500+ coding problems across LeetCode and SQL platforms.

Achievements

- Finalist in the state-level Sakshi Math Bee competition.
- Recipient of the Prathibha Award from the Government of Andhra Pradesh for academic excellence.
- Secured 3rd Place in Abhiyanth 2024 Hackathon conducted by the CSE Department.

SoftSkills

- Time Management
- Communication
- Leadership

Languages

- Telugu
- English.
- Hindi
